

AWS Water Softener

Quality Water Softening

The AWS water softener provides an abundant supply of softened water throughout your home.

Water Softening System Features

Unique Control Valve

Sophisticated microprocessor with simple set-it-and-forget-it controls provides exceptional reliability and convenience.

Automatic Bypass During

Regeneration You won't be without water during the regeneration process.

Softening Resin Provides years of soft water service for you and your family.

How the AWS Water Softener Works

Step 1: Water enters your home and into the AWS' softening tank.

Step 2: The water is softened as it passes through the softening resin.

Step 3: Once softened, the water leaves the softening tank and is delivered throughout your home.

Regeneration At metered intervals, the unit begins a regeneration process that restores and rejuvenates the softening resin. Using salt as a regenerant, the retained hardness ions are flushed out of the system and down the drain. The unit then prepares itself for the next conditioning cycle.

Note: Potassium chloride may be used instead of salt.

Other Benefits

- Plastic enclosure fits tightly to protect control components from external elements.
- The brine tank is equipped with overflow protection.

CALIFORNIA RESIDENTS: Water treatment devices sold to retail consumers in California accompanied by certain health claims must be certified by the California Department of Public Health. The water conditioner is not certified by the State of California for the purpose of making health claims.

Benefits will be provided by various types of equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent dealers may include, together with your product, a product or component that is not manufactured by AWTP, LLC. Any product may be covered by the manufacturer of that product, and is not covered by the AWTP, LLC warranty. AWTP, LLC does not warrant that your AWTP, LLC product and the product will perform properly when used together, and assumes no liability therefore.
